

SLEEVEZ_{FOR IPOD}

A UNIQUE AND FUNCTIONAL SLEEVE CASE CONSTRUCTED FROM RADTECH'S REMARKABLE, SUPER-MICROFIBER OPTEX FABRIC. SLEEVEZ ALLOW FULL CONTROL OF YOUR IPOD DIRECTLY THROUGH THE CASE VIA DEBOSSSED CONTROL ZONES. YOUR SLEEVED IPOD ALSO FITS VERY SECURELY IN THE APPLE CLIP CASE. SLEEVEZ WILL NOT ALLOW USE OF THE DOCK - MUST USE CABLE TO SYNC / CHARGE - WILL NOT FIT INTO APPLE MINI DOCK.

CAREFULLY INSERT THE BOTTOM OF THE IPOD INTO THE TOP OF THE SLEEVEZ - THE SLEEVEZ FITS VERY SNUGLY, AND ESPECIALLY SO WHEN NEW, SO EXPECT THE INITIAL DONNING TO BE MILDLY LABORIOUS. ANGLE THE IPOD INTO THE SLEEVE MAKING SURE THE TOP EDGE OF THE VINYL WINDOW DOESN'T BECOME FOLDED OVER ON ITSELF. LIFTING THE DISPLAY WINDOW SO THAT IT DOES NOT CLING WILL ALLOW AN EASIER SLIDE.

ONCE THE SLEEVE IS PARTIALLY ON THE IPOD, USE ONE HAND TO SLIDE THE CASE ON, WHILE PUSHING DOWN ON THE TOP EDGE OF THE IPOD WITH YOUR FREE HAND'S THUMB. THE IPOD CAN ALSO BE INVERTED AND THE SLEEVE SLID DOWNWARD. ROTATE THE SLEEVE AS NECESSARY TO ALIGN THE WINDOW AND CONTROL ZONES.

USE AND CARE:

ENSURE IPOD AND SLEEVEZ ARE CLEAN BEFORE DONNING CASE AND ENSURE THAT DEBRIS DOES NOT BUILD UP BETWEEN SLEEVEZ AND IPOD. REMOVE IPOD FROM SLEEVEZ PERIODICALLY TO CLEAN IPOD AND SLEEVEZ CASE - MORE FREQUENTLY IF USING IN DUSTY OR DIRTY ENVIRONMENTS. CERTAIN ENVIRONMENTAL FACTORS AND BUILD UP OF SKIN OR BODY OILS ON THE OUTSIDE OF SLEEVEZ MAY CAUSE THE FABRIC DYES TO BLEED ONTO AN IPOD. REGULAR INSPECTION AND CASE CLEANING WILL PREVENT THIS - IF BLEEDING DOES OCCUR, USE COMMON RUBBING ALCOHOL OR RADTECH ICE CREME'S A POLISH TO REMOVE.

YOUR SLEEVEZ SHOULD BE HAND WASHED WITH MILD LIQUID SOAP. AIR FLUFF, OR LOW-HEAT DRY. LOW HEAT IRONING CAN BE DONE USING A PRESS-CLOTH - DO NOT PLACE IRON DIRECTLY ON SLEEVEZ.
