

ScreenSavrz[®] for iMac[®]

Protection / Cleaning / Refinishing

Form fitting LCD iMac[®] display cover and cleaner

A Lint-free, non-woven ultra-microfiber form-fitting cover for iMac[®] computers. The fabric is designed for polishing precision plastic optics. Therefore, you can safely clean and polish any surface of your computer, LCD display, PDA, cell phone, iPod, camera lenses, eyeglasses, CD's, etc.

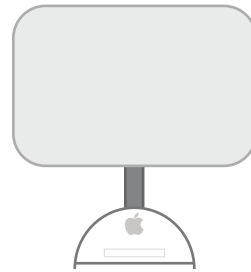

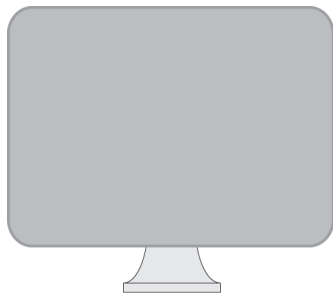

Use:

Simply stretch the cover over the iMac[®]'s display. Start by stretching and tucking over both top or bottom corners, then pulling and tucking over the remaining corners. (Like a fitted bed sheet)

Clean your display by wiping with the cover dry. It will not scuff or scratch. If you have light scuffing present on your display, simply dampen a portion of the cloth with clean water and polish the display briskly with the power off. Ensure that the cloth is not dripping with water, only damp. Follow by polishing with a dry section of the cloth. The cloth will air dry very quickly after being dampened.

Care:

Shake or brush the cloth to remove most debris. ScreenSavrz may be machine or hand washed with mild detergents and soaps. Machine dry, low, or no heat. Ironing is not necessary. Cloth should not wrinkle, but may be ironed with a press cloth if desired. If emblazoned, hand wash for maximum graphics life.
